Advantages of ERADICATE...

- Active ingredient is allowable food additive
- Application rate between 5 kg/ha (light infestation) to 15 kg/ha (heavy infestation – over 200 snails per m²).
- Provides over 40% more baiting points than Multiguard
- Non-toxic to pets, native fauna and other animals if used as directed.
- Rain fast
- Active ingredient slowly degrades in moist pellets over several weeks compared to metaldehyde which degrades rapidly
- In over 80 trials Eradicate out performed Australian made metaldehyde pellets
- In typical Australian conditions out performs methiocarb (blue) pellets
- Active ingredient does not accumulate in the environment.
- Unlike metaldehyde can be used up to harvest- no withholding period.
- Unlike metaldehyde can be used near waterways.
- Unlike metaldehyde does not pose a threat to surface or drinking water.
- Effective on juvenile snails.
- Contains child taste deterrent (as required by APVMA).
- Manufactured by a modified “dry” process.
- Patented technology developed by Australian scientists.
- Product designed for Australian conditions.
- Uses “molecular wrap” technology.
- Eradicate kills woodlice
- After eating Eradicate Snail and slugs stop feeding but do not die immediately. They move away from the bait, so there is no crowding, and die sometime later.
- Eradicate is believed to work by replacing the copper in the oxygen carrier with iron making it ineffective. The mollusk dies of suffocation.
